EXAMINER

HENDERSON, MARK T

ART UNIT PAPER NUMBER

3722

DATE MAILED: 09/08/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/606,426

Applicant(s)

HILICKI ET AL.

Examiner

Mark T. Henderson

Art Unit

3722

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 August 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-6, 8-33, 37, 39-58, 63, 65-68 and 70 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-6, 8-33, 37, 39-58, 63, 65-68, 70 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED OFFICE ACTION

Faxing of Responses to Office Actions

In order to reduce pendency and avoid potential delays, TC 3700 is encouraging FAXing or responses to Office Actions directly into the Group at (571) 273-8300. This practice may be used for filing papers, which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into TC 3700 will be promptly forwarded to the examiner.

1. Claims 1, 8, 44, and 45 have been amended for further examination. Claims 7, 9, 34-36, 38, 59-62, 64 and 69 have been canceled.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made

to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-6, 8-33, 37, 39-58, 63, 65-68, and 70 are rejected under 35 U.S.C. 103(a) as being unpatentable over D'Andrea in view of "ISBN 0-439-20822".

D'Andrea discloses in Fig. 1-3, a book and method of making a book having a theme comprising: a first book cover (12); a second book cover (14) joined to the first book cover by spine (not shown); wherein the exterior of the first book cover (Fig. 1) defines one aperture (11) not cut all the way through such that a support is provided (Col. 3, lines 32-35); wherein a theme (Col. 3, lines 10-19) is displayed on the first cover (see Fig. 1); a plurality of sheets fastened together and attached to the covers (See Fig. 2); wherein at least one of the plurality of sheets provides pre-printed information (Col. 3, lines 50 and 51) related to the theme; and wherein at least one of the sheets can be blank (Col. 4, lines 1-11); wherein the covers can be made from card stock (Col. 3, lines 35-40); and wherein a removable/ insertable imaged substrate is displayed on the support in the aperture (11).

However, D'Andrea does not disclose an image related to the book theme is displayed on the support in the aperture; and a cap removable insertable into the aperture; a book theme relating to geographic region, state, province, countries; wherein the theme related information is a story, non-fictional, or fictional; wherein an aperture is aligned with the cover apertures.

ISBN discloses in Fig. 1-5, a book having a theme; an image substrate (coin/cap having an embossed image) related to the book theme that is removably insertable in the aperture and displayable on the support (however, the image is not displayed directly).

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify D'Andrea's book with an imaged substrate being a coin/cap having an embossed image that is displayed on the support and in the aperture as taught by ISBN' for providing an alternate imaged support for placement in the aperture.

In regards to **Claim 1**, wherein the book is "capable of displaying one or more coins related to the theme", and a "coin receivable" aperture, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. Therefore, the book of D'Andrea is capable of displaying one or more coins, and having apertures that can receive coins.

In regards to the **Claims 1-6, 11-32, 40-42, 47-57, and 65-67**, it would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate any desired indicia on the cover and sheets, since it would only depend on the intended use of the assembly and the desired information to be displayed. Further, it has been held that when the claimed printed matter is not functionally related to the substrate, it will not distinguish the invention from the prior art in terms of patentability. The fact that the content of the printed matter placed on the substrate may render the device more convenient by providing an end user with a specific type of information document or form does not alter the functional relationship. Mere support by the substrate for the printed matter is not the kind of functional relationship

necessary for patentability. Therefore, it would have been obvious to place any type of indicia on the cover and sheets, since applicant has not disclosed the criticality of having particular indicia, and the invention would operate equally as well with any type of indicia.

In regards to **Claim 39**, it would have been obvious to place the sheet apertures at any desired location, since it has been held that rearranging parts of an invention involves only routine skill in the art. Therefore, it would have been obvious to place the sheet apertures at any desired location since applicant has not disclosed the criticality of having the apertures at a particular location, and would function equally as well at any location.

In regards to **Claim 10 and 46**, it would have been obvious to one having skill in the art to construct the aperture in any desirable size, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. Therefore, it would have been to construct the imaged support/ imaged cap with any desirable dimension (in this case the diameter), since applicant has not disclosed the criticality of having a particular size, and invention would function equally as well if constructed in any desirable size.

Response to Arguments

Applicant's arguments with respect to claims 1-6, 8-33, 37, 39-58, 63, 65-68, and 70 have been considered but are moot in view of the new ground(s) of rejection.

D'Andrea is now used to disclose a book having a front cover wherein an imaged substrate can be placed in the aperture on the exterior of the front cover, in which the aperture is supported (due to the face that the interior does not disclose a cut-through-aperture. However, D'Andrea does not disclose wherein an image is displayed on the support and in the aperture, and a cap removable cap insertable in the aperture. ISBN discloses in Fig. 1-5, a book having a theme; an image substrate (coin/cap having an embossed image) related to the book theme that is removably insertable in the aperture and displayable on the support (however, the image is not displayed directly). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify D'Andrea's book with an imaged substrate being a coin/cap having an embossed image that is displayed on the support and in the aperture as taught by ISBN' for providing an alternate imaged support for placement in the aperture.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rohr et al discloses a coin display book. Benderly discloses an imaged cap/coin.

Art Unit: 3722

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark T. Henderson whose telephone number is (571) 272-4477, and informal fax number is (571) 273-4477. The examiner can be reached on Monday-Friday from 9:00AM to 3:45PM. If attempts to reach the examiner by telephone are unsuccessful, the Examiner Supervisor, Monica Carter, can be reached at (571) 272-4475. The formal fax number for TC 3700 is (571) 273-8300.
